

## **2C30 Chases**

- a vertical chases should not be deeper than  $\frac{1}{3}$  of the wall thickness or, in cavity walls,  $\frac{1}{3}$  of the thickness of the leaf
- b horizontal chases should not be deeper than  $\frac{1}{6}$  of the thickness of the leaf of the wall
- c chases should not be positioned to impair the stability of the wall particularly when hollow blocks are used.
